

Firearms Trace Data Reports

A key component of ATF's enforcement mission is the tracing of firearms on behalf of thousands of local, state, federal and international law enforcement agencies. Firearms trace data is critically important information developed by ATF. ATF has prepared the following state-by-state and international reports utilizing trace data which is intended to provide the public with insight into firearms recoveries.

Please note: Use the year filter below to display all reports available for the selected year. National reports covering 2024 and future periods have not been published and will be released once they become available.
